

2. What are HTML Entities? List out 5 Commonly used HTML entities.

Ans – HTML Entities:

There are some reserved characters in HTML, so when we want to represent those character as a regular text, we need to use HTML entities. Entities provide an alternative method to display HTML reserved keyword. When we want to display a reserved keyword, we always use its corresponding entity, because, the browser may confuse the standard text with its reserved keywords.

Commonly used HTML entities:

1. Quotation mark (")
2. Apostrophe (')
3. Ampersand (&)
4. Less-than (<)
5. Greater-than (>)
